Ideation Phase – Brainstorm & Idea Prioritization

Date	3 October 2026
Team ID	SWTID-2026-2050
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	

Step-1: Team Collaboration Gathering, and Select the Problem Statement

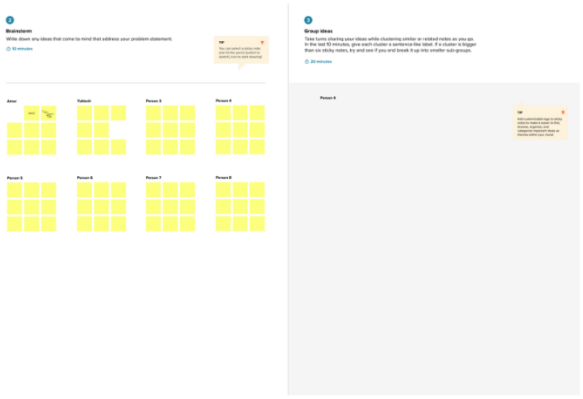

Selected Problem Statement:

Employees need a simple and efficient way to request standard laptops, while the IT procurement team needs to process these requests quickly without performing repetitive manual activities. The existing process involves multiple steps such as request submission, approval, task creation, assignment, and tracking, which can result in delays and manual errors.

Customer Problem:

- Employees may have difficulty tracking their laptop requests.
- IT teams spend time manually processing standard laptop requests.
- Procurement tasks need to be created and assigned manually.
- Manual processing can cause delays and inconsistencies.
- A standardized automated workflow is required.

Step-2: Brainstorm, Idea Listing and Grouping

S.No.	Brainstormed Idea	Category/Group
1	Create a Service Catalog item for Standard Laptop requests	Request Management
2	Automate the laptop request process using Flow Designer	Workflow Automation
3	Automatically trigger the flow when a laptop request is submitted	Workflow Automation
4	Automatically create a Catalog Task for every approved laptop request	Task Automation
5	Automatically assign the task to the Hardware group	Task Assignment
6	Automatically update the task description	Task Automation
7	Automate the approval process	Approval Management
8	Send notifications when the request status changes	Notifications
9	Allow employees to track their request status	Request Tracking
10	Maintain a standard workflow for all standard laptop requests	Process Standardization
11	Reduce manual intervention by the IT team	Process Improvement
12	Validate the complete request-to-task process	Testing & Validation

Grouped Ideas

1. Request Management

- Standard Laptop Service Catalog item

- Employee request submission
- Request tracking

2. Workflow Automation

- Service Catalog trigger
- Flow Designer automation
- Standardized workflow

3. Task Automation

- Automatic Catalog Task creation
- Automatic task description
- Automatic task assignment

4. Approval Management

- Approval handling
- Approved/rejected request processing

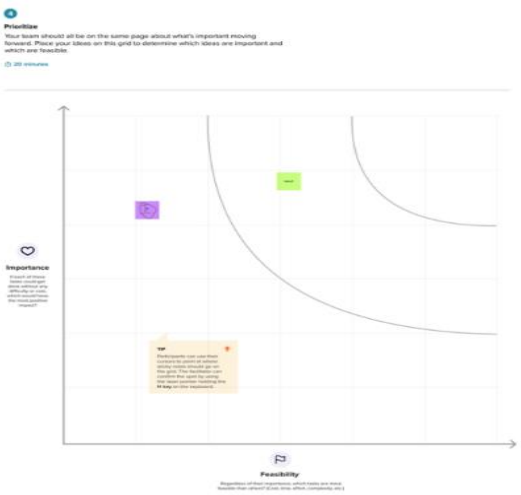

5. Notifications

- Request confirmation
- Approval notification
- Task/status notification

6. Process Improvement

- Reduce manual work
- Reduce processing time
- Minimize human errors
- Improve consistency

Step-3: Idea Prioritization

Idea	Impact	Feasibility	Priority
Automate laptop request using Flow Designer	High	High	**1 – Highest**
Automatically create Catalog Task	High	High	**2 – Highest**
Automatically assign task to Hardware group	High	High	**3 – High**
Automate approval process	High	Medium	**4 – High**
Create Standard Laptop Service Catalog item	High	High	**5 – High**
Request status tracking	Medium	High	**6 – Medium**
Automated notifications	Medium	High	**7 – Medium**
Process standardization	High	High	**8 – High**
Reduce manual intervention	High	High	**9 – High**
Advanced reporting and analytics	Medium	Medium	**10 – Medium**

Final Selected Idea

Automate Standard Laptop Procurement using ServiceNow Flow Designer.

The selected solution is to create a **Standard Laptop Service Catalog item** and connect it to a **Flow Designer workflow**. When an employee submits a laptop request, the flow is triggered automatically and creates a **Catalog Task** with the required description, **Hardware** assignment group, and approval information.

This idea was prioritized because it has **high business impact and high feasibility**. It reduces repetitive manual work, improves consistency, and provides a standardized process for handling standard laptop requests.
