Project Design Phase-II
Data Flow Diagram & User Stories

Date	3 October 2026
Team ID	SWTID-2026-2050
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

Data Flow Diagrams:

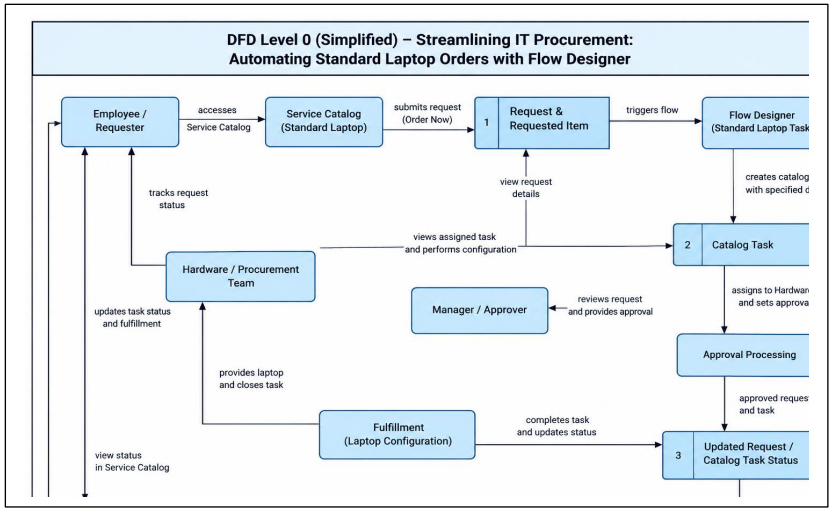

A Data Flow Diagram (DFD) represents how information enters, moves through, is processed by, and is stored within a system. The template expects the DFD to clearly show the system's information flow and data storage.

Example: (Simplified)

1. Employee selects Standard Laptop from Service Catalog and submits the request (Order Now).
2. ServiceNow validates the request and creates the Requested Item (RITM).
3. Manager/Approver reviews the request and provides an approval decision.
4. Flow Designer triggers the "Standard Laptop Task" flow and creates a Catalog Task, assigning it to the Hardware group.
5. Hardware team updates the task status and fulfillment progress in ServiceNow.
6. Employee can view the request and task status through the ServiceNow portal.

Example: DFD Level 0 (Industry Standard)

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Employee / Requester	Standard Laptop Catalog Item	USN-1	As an employee, I can access the **Standard Laptop** catalog item so that I can request a standard laptop.	I can navigate to **Service Catalog → Hardware → Standard Laptop** and open the catalog item.	High	Sprint-1
Employee / Requester	Standard Laptop Request	USN-2	As an employee, I can submit a Standard Laptop request by clicking **Order Now**.	A request should be created successfully and a Request Number should be generated.	High	Sprint-1
Employee / Requester	Request Tracking	USN-3	As an employee, I can view my submitted laptop request and its Requested Item record.	I can open the Request Number and view the associated Requested Item.	Low	Sprint-2
ServiceNow System	Flow Automation	USN-4	As a ServiceNow system, I can trigger the **Standard Laptop Task** Flow when a Standard Laptop Service Catalog request is submitted.	The Service Catalog trigger should start the configured Flow Designer flow automatically.	Medium	Sprint-1
ServiceNow System	Flow Automation	USN-5	As a ServiceNow system, I can run the Standard Laptop Task flow using the configured **System User**.	The flow should execute successfully using the configured run-as user.	High	Sprint-1
ServiceNow System	Catalog Task Creation	USN-6	As a ServiceNow system, I can automatically create a Catalog Task for a Standard Laptop request.	A Catalog Task should be generated automatically after the flow executes.	High	Sprint-1
ServiceNow System	Catalog Task Creation	USN-7	As a ServiceNow system, I can populate the Request Item field of the Catalog Task using the Requested Item Record.	The generated Catalog Task should contain the correct Requested Item.	High	Sprint-1
ServiceNow System	Task Information	USN-8	As a ServiceNow system, I can set the Catalog Task short description to **"Laptop need to Configured"**.	The Catalog Task should display the specified short description.	High	Sprint-1

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
ServiceNow System	Task Information	USN-9	As a ServiceNow system, I can set the Catalog Task description to **"Laptop need to Configured"**.	The Description field should contain the specified text.	Medium	Sprint-1
ServiceNow System	Task Assignment	USN-10	As a ServiceNow system, I can assign the generated Catalog Task to the **Hardware** assignment group.	Assignment Group should automatically be set to **Hardware**.	High	Sprint-1
ServiceNow System	Approval Processing	USN-11	As a ServiceNow system, I can set the approval value for the Catalog Task to **Approved** according to the configured flow.	The Approval field should display **Approved** when the flow completes the configured action.	High	Sprint-1
Manager / Approver	Request Approval	USN-12	As a Manager/Approver, I can review the Standard Laptop request and provide an approval decision.	The approver should be able to access the approval record and provide the required decision.	High	Sprint-1
Hardware / Procurement Team	Procurement Fulfillment	USN-13	As a Hardware team member, I can view the Catalog Task assigned to the Hardware group.	The generated task should be available to the Hardware assignment group.	High	Sprint-1
Hardware / Procurement Team	Task Processing	USN-14	As a Hardware team member, I can view the laptop configuration requirement in the Catalog Task.	The task should display the configured short description and description.	High	Sprint-1
Hardware / Procurement Team	Task Status	USN-15	As a Hardware team member, I can update the status of the Catalog Task during laptop fulfillment.	. The task status should be updated and reflected in the Requested Item record.	Medium	Sprint-2

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Employee / Requester	Request Status Tracking	USN-16	As an employee, I can view the status of my Standard Laptop request.	. The employee should be able to open the request and view the current request/task status.	Medium	Sprint-2
Administrator	Flow Configuration	USN-17	As an administrator, I can configure the Standard Laptop Task Flow in Flow Designer.	The flow should contain the Service Catalog trigger and Create Catalog Task action.	High	Sprint-1
Administrator	Flow Maintenance	USN-18	As an administrator, I can activate and maintain the Standard Laptop Task flow.	The flow should be active and available for Standard Laptop requests.	Medium	Sprint-1
Administrator	Process Engine Configuration	USN-19	As an administrator, I can associate the Standard Laptop catalog item with the Standard Laptop Task flow.	The Standard Laptop catalog item should use the configured Flow Designer process.	High	Sprint-2
Administrator	Workflow Validation	USN-20	As an administrator, I can verify that the complete Standard Laptop procurement workflow executes successfully.	Request creation, flow execution, approval processing, Catalog Task creation, assignment, and status update should work as configured.	High	Sprint-2
