Project Design Phase

Problem – Solution Fit Template

Date	3 October 2026
Team ID	SWTID-2026-2050
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The process of requesting and procuring standard laptops in an organization can involve multiple manual steps such as submitting requests, checking approvals, creating procurement tasks, assigning tasks to the hardware team, and updating request status. This can cause delays, manual errors, and difficulty in tracking requests.

Purpose:

- **Automate laptop procurement** by using ServiceNow Flow Designer to process standard laptop requests automatically.
- **Reduce manual effort** involved in creating and assigning laptop procurement tasks.
- **Minimize errors** by ensuring required task details, approval status, and assignment group are populated consistently.
- **Improve processing efficiency** by automatically creating Catalog Tasks for the Hardware team.
- **Provide better tracking and visibility** of laptop requests from submission to task completion.

Template:

Project Name: Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Define IT Segments, fit into System

1. IT PURCHASING SEGMENT(S) — CS

Which user groups do you serve?
(e.g., standard employees, remote staff, tech roles)

Examples:
- Which - user groups do you serve?
- Standard employees, remote staff, tech

6. PROCUREMENT CONSTRAINTS — CC

What limits the standard ordering process?
(e.g., budget caps, vendor contracts, global shipping)

Examples:
- What limits the - standard ordering process?
- (e.g., budget caps, vendor contracts, global shipping)

5. EXISTING ORDERING SOLUTIONS — AS

How do teams currently get hardware?
(e.g., manual email requests, old web forms, non-catalog buys)

Examples:
- How do teams currently get hardware?
- e.g. manual email requests, old web forms, non-catalog buys
- Whas solution xses i.e. pen prnd paper, in non-catalog buys

Explore Old, differentiate New

Focus on Jobs, tap into BE, understand RC

2. JOBS-TO-BE-DONE / MANUAL PAIN-POINTS — J&P

Which jobs (problems) does this automation solve for users & IT? (e.g., wait times, double-entry, error-prone)

Examples:
- Which jobs (problems) does this automation IT?
- (e.g., wait times, double-entry, error-prone

9. MANUAL ORDER ROOT CAUSE — MM

What is the real reason this manual work exists?
(e.g., siloed systems, complex approvals, no single platform)

Examples:

7. PROCURE. BEHAVIOR (PRE-AUTOM) — BE

What does the current user *do* to order?
(e.g., copy email info, chasing approvals, asking IT for status)

Examples:
- What does the current user *do** to order?
(e.g., copy email info, chasing approvals, asking IT for status)

Understand old process

Measure saleer flow start

3. AUTOMATION TRIGGERS — TR

What starts the automated flow? (e.g., new employee onboarding ticket, "Order Laptop" request on portal)

Examples:

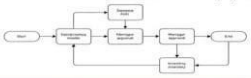

4. EMOTIONS: BEFORE / AFTER — EM

BEFORE
- Frustration
- Confusion

AFTER
- Speed
- Confidence
- Ease

10. THE AUTOMATED FLOW DESIGNER SOLUTION — SL

Describe the new end-to-end automated process.
(e.g., user selects standard model -> manager approval -> direct to vendor API -> automatic inventory update)

Connect all steps

8. CHANNELS OF AUTOMATION — CH

8.1 **ONLINE**
- Service Portal
- IT Request Catalog

8.2 **INTEGRATION**
- Vendor API
- Inventory DB

Map new channels
