| Date | 3 October 2026 |
| Team ID | SWTID-2026-2050 |
| Project Name | Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer |
| Maximum Marks | |

**Test Scenarios & Results**

| Test Case ID | Scenario (What to test) | Test Steps (How to test) | Expected Result | Actual Result | Pass/Fail |
|---|---|---|---|---|---|
| **FT-01** | Standard Laptop Catalog Item Validation | Navigate to **Service Catalog → Hardware → Standard Laptop** and open the catalog item. | Standard Laptop catalog item should open successfully with the required request options. | Standard Laptop catalog item opened successfully. | **Pass** |
| **FT-02** | Laptop Request Submission | Open Standard Laptop and click **Order Now** to submit the request. | A new request should be created and a Request Number should be generated. | Request was created and Request Number was generated. | **Pass** |
| **FT-03** | Service Catalog Trigger Validation | Submit a Standard Laptop request and check the **Standard Laptop Task** Flow Designer execution. | The Service Catalog trigger should execute the flow automatically. | Flow was triggered successfully after request submission. | **Pass** |
| **FT-04** | Flow Execution Validation | Check the Flow Designer execution details after submitting the request. | The flow should execute without errors. | Flow executed successfully without errors. | **Pass** |
| **FT-05** | Requested Item Mapping | Open the flow and verify that **Requested Item Record** is mapped to the **Request item** field in Create Catalog Task. | Requested Item should be correctly passed to the Catalog Task. | Requested Item was mapped successfully. | **Pass** |
| **FT-06** | Catalog Task Creation | Submit a Standard Laptop request and open the Requested Item record. | A Catalog Task should be automatically created. | Catalog Task was created successfully. | **Pass** |

| | | | | | |
|---|---|---|---|---|---|
| **FT-07** | Short Description Validation | Open the generated Catalog Task and check the Short Description. | Short Description should be **"Laptop need to Configured"**. | Short Description displayed correctly. | **Pass** |
| **FT-08** | Description Field Validation | Open the generated Catalog Task and check the Description field. | Description should be **"Laptop need to Configured"**. | Description displayed correctly. | **Pass** |
| **FT-09** | Assignment Group Validation | Open the Catalog Task and check the Assignment Group. | Assignment Group should be **Hardware**. | Assignment Group was set to Hardware. | **Pass** |
| **FT-10** | Approval Field Validation | Check the Approval field of the generated Catalog Task. | Approval field should be set to **Approved**. | Approval field displayed Approved. | **Pass** |
| **FT-11** | Requested Item Validation | Open the Requested Item from the Request record and verify its details. | Requested Item should contain the submitted Standard Laptop request. | Requested Item was displayed correctly. | **Pass** |
| **FT-12** | Catalog Task Status Validation | Navigate to the **Catalog Tasks** section of the Requested Item. | The automatically created task should be visible with the configured details. | Catalog Task was visible with the expected details. | **Pass** |
| **FT-13** | End-to-End Workflow Test | Submit a Standard Laptop request and follow the process from Request creation to Catalog Task creation. | Complete workflow should execute successfully without manual flow intervention. | End-to-end workflow completed successfully. | **Pass** |

| **Test Case ID** | **Scenario (What to test)** | **Test Steps (How to test)** | **Expected Result** | **Actual Result** | **Pass/Fail** |
|---|---|---|---|---|---|
| **PT-01** | Flow Execution Time | Submit a Standard Laptop request and observe the time taken for the flow to create the Catalog Task. | Flow should execute within an acceptable time without errors or timeout. | Flow executed successfully within the observed execution time. | **Pass** |
| **PT-02** | Multiple Request Processing | Submit multiple Standard Laptop requests and monitor Flow Designer executions. | Each request should trigger its corresponding flow execution without failure. | Requests were processed successfully. | **Pass** |

| | | | | | |
|---|---|---|---|---|---|
| **PT-03** | Catalog Task Creation Performance | Submit a Standard Laptop request and verify the time taken for the Catalog Task to appear under the Requested Item. | Catalog Task should be created successfully without significant delay. | Catalog Task was created successfully. | **Pass** |

**Performance Testing**

| | | | | | |
|---|---|---|---|---|---|
| **PT-04** | Flow Reliability Test | Execute the Standard Laptop request workflow multiple times. | Flow should consistently create the required Catalog Task with correct field values. | Flow executed consistently with the expected results. | **Pass** |
| **PT-05** | End-to-End Performance | Submit a Standard Laptop request and monitor the complete process from request creation to Catalog Task generation. | Workflow should complete successfully without errors or timeouts. | End-to-end workflow completed successfully. | **Pass** |
