Project Development Phase

Model Performance Test

Date	3 October2026
Team ID	SWTID-2026-2050
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	

Accuracy	**Result**
Test Type	ServiceNow Flow Designer Functional/Workflow Testing

Test Scenario	Submit a Standard Laptop catalog request

Model Performance Testing: 1.

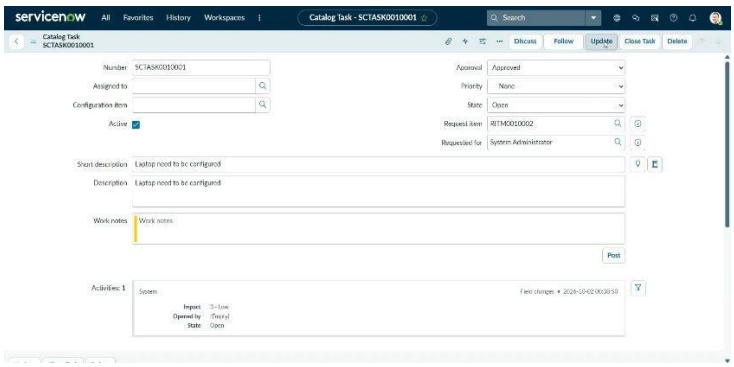

Model Summary

Model Summary	**Details**
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Platform	ServiceNow
Technology	Flow Designer, Service Catalog, Catalog Item, Catalog Task
Flow Name	Standard Laptop Task
Application	Global
Run As	System User
Trigger	Service Catalog
Action	Create Catalog Task
Input	Standard Laptop Service Catalog request
Processing	When a Standard Laptop request is submitted, the Flow Designer flow automatically creates a Catalog Task.
Catalog Task	Laptop need to Configured
Assignment Group	Hardware
Approval	Approved
Expected Output	A Catalog Task should be created automatically for the Hardware assignment group with the specified short description and approval status.
Purpose	Reduce manual effort in standard laptop procurement and ensure consistent task creation and assignment.

2. Accuracy / Performance Testing

Expected Result	Flow should trigger automatically and create a Catalog Task
Expected Short Description	Laptop need to Configured
Expected Assignment Group	Hardware
Expected Approval	Approved
Expected Status	Catalog Task created successfully
Validation	Verify the Requested Item and Catalog Task records

Result	Pass/Fail based on actual execution

S.No.	Parameter	Values	Screenshot
1	FineTuning Result (if Done)	**Not Applicable – No ML model training or finetuning was performed.** Workflow configuration was tested and validated in ServiceNow.	

S.No.	Test Case	Expected Result	Actual Result	Status
1	Open Standard Laptop catalog item	Standard Laptop item should open	As expected	Pass
2	Click Order Now	Laptop request should be submitted	As expected	Pass
3	Request is created	Request Number should be generated	As expected	Pass
4	Requested Item is created	RITM should be generated	As expected	Pass
5	Flow is triggered	Standard Laptop Task flow should execute	As expected	Pass
6	Create Catalog Task action executes	Catalog Task should be created	As expected	Pass
7	Request Item mapping	Requested Item should be mapped to Catalog Task	As expected	Pass
8	Short Description	Should display **Laptop need to Configured**	As configured	Pass
9	Description	Should display **Laptop need to Configured**	As configured	Pass
10	Assignment Group	Should be **Hardware**	As configured	Pass
11	Approval	Should be **Approved**	As configured	Pass
12	Catalog Task verification	Task should be visible under Catalog Tasks	As expected	Pass

13	End-to-end execution	Complete workflow should execute successfully	As expected	Pass
